

Umeå University

Professorship in Clinical Chemistry

The Department of Medical Biosciences invites applications for a position as professor in clinical chemistry. The department is affiliated to the Faculty of Medicine at Umeå University. Our main tasks consist of research and education at undergraduate level, including supervision of postgraduate students. A wide range of high quality research projects are carried out by research groups who work closely with scientists from other clinical departments at the university. The common theme is the use of molecular approaches to study the mechanisms of biological processes involved in human disease. The department offers excellent support facilities. For more information about the department, please visit our website at: <http://www.medbio.umu.se>.

The professorship includes clinical duties and the successful applicant will also work as a medical doctor within clinical chemistry at Laboratory Medicine, University Hospital of Northern Sweden.

Qualifications

For appointment as professor, the applicant, besides having a degree in medicine, must hold a doctoral degree or other equivalent scientific and academic skills that are relevant to the subject area.

Documentation demonstrating teaching, academic and supervision skills within the field of clinical chemistry must be provided.

For further information about the position, application guidelines, and information about how to submit the required application documentation, please visit the following websites:
